

PUMP SCHOOL

INVITATION

**COURSE: GRUNDFOS BOREHOLE PUMPS,
SP, SQ (E), AND SQ FLEX RANGES
& THE MARKETS**

DATES & VENUES:

12th March - Leighton Buzzard

The day will not only focus on the full Grundfos Borehole range but on the markets where borehole pumps can be used and includes the suitability of submersible borehole pumps in a world more and more dependent on water from the ground, as well as irrigation and borehole extraction.

We will also look at pump control in an energy conscious world, pump protection using MP204, measurement and treatment of the extracted water.

There will also be an opportunity to dismantle and rebuild an SP to get a better understanding of the various features and benefits that will be discussed during the day. (Safety shoes will be required).

The course requires a good knowledge of Pumps and Borehole applications.
